Electronic Medical Record (EMR) Privacy Attestation Form

Included as part of our annual requirements training on HealthStream was information concerning privacy and compliance issues associated with utilizing the Electronic Medical Record (EMR) Systems at Covenant Health. As was communicated to you during your training, the EMR should only be accessed for the purposes of Treatment, Payment, and hospital Operations (TPO). You are prohibited from accessing your own EMR or the EMR for your family members, friends, or acquaintances. While utilizing the EMR system, always use the “minimum necessary standard,” which means only utilize the minimum amount of information needed to complete your job. If you are found accessing the EMR system inappropriately, the corrective action will be immediate termination.

By acknowledging this page, you are attesting that you have received the privacy and compliance training required for all Covenant Health employees. Furthermore, you are acknowledging that you understand the privacy regulations/guidelines and the consequences of being non-compliant with those regulations/guidelines.
